Subject: Asbestos Dump Site RI/FS
Millington, New Jersey

Dear Mr. McKnight:

Confirming our telephone conversation of June 7, 1984. NUS/REMPO anticipates a June 19 submittal of the Asbestos Dump Site Work Plan, incorporating review comments contained in the March 29, 1984 NUS/FIT compilation, as well as those verbal comments received from EPA-Edison during a meeting on April 10. As you had agreed, this version will be considered a second draft, since further revision will be required in the event that responsible parties decline to conduct the RI/FS. This is so because NUS/FIT would then undertake the RI activities, and has not had the opportunity to review the second draft. In this regard, we agreed that revision of Optional Form 60's for REMPO and FIT portions of the RI/FS would be deferred until conclusion of negotiations with responsible parties.

Subsequent to our conversation I reviewed this approach with Mr. Mark Haulenbeek, EPA Region II FIT RPO, and obtained his agreement. In addition, I informed Mr. Haulenbeek that I would forward a copy of the second draft Work Plan to him and to NUS/FIT for their review. In the event that responsible parties decline to conduct the work, he will issue a TDD to FIT to participate in development of the final Work Plan.

If you have any comments or questions, please feel free to give me a call.

Very truly yours,

John A. George
Senior Scientist
